

SKY FLATBED CUTTER P5035DC

DOUBLE BLADE (CUTTING + CREASING)

- ✓ Sample making
- ✓ Cutting
- ✓ Crease treatment of cardboard boxes in one step

KEY FEATURES

HIGH PRECISION
Accurate cutting for perfect results

CCD CAMERA
Automatic contour cutting with CCD camera

DUAL HEAD SYSTEM
Cutting and creasing in one pass for higher productivity

HIGH EFFICIENCY
Ideal for small batch production

COST SAVING
Reduce labor cost & increase efficiency

PERSPECTIVE VIEW

Suitable for crystal labels, heat transfer printing, cardboard, three dimensional cardboard cutting, etc.
Widely used in the market

Suitable for three-dimensional cardboard, electronic product maintenance, screen film, packaging box sample cutting, etc.
multifunctional cutting machine

Product Specifications

Model	SKY P5035DC	Knife head	Double blade (Cutting + Creasing)
Cutting Speed	1 mm/s – 800 mm/s	Positioning method	Camera positioning system with arbitrary origin setting
Cutting Thickness	1.2 mm within	Fixed material method	700W - vacuum adsorption
Cutting Pressure	1000 can	Assignment Method	Platform based
Cutting accuracy	±0.15mm	Drive motor	Stepping
Cutting area	500mm*350mm	Transmission interface	USB, USB drive offline, Ethernet port
Product size	954*292*694mm	Compatible software formats	Sign Master professional cutting software is compatible with AI software
Cutting materials	Can cut various materials such as PET, PVC, cardboard, self-adhesive, film, fiber composite materials, fabrics, PU, plywood, etc.	Instruction system	CoralDraw, compatible with engraving machine output software HPGL compatible format. CNC panel Multilingual LCD touch panel
